

Dr. Amit Rauthan

M.B.B.S., M.D. (Medicine), D.M. (Medical Oncology)

**Consultant in Medical Oncology, Hemato-Oncology &
Blood & Marrow Transplant**

Qualifying as a doctor in 1997, Dr Rauthan went on to acquire further training and qualifications in Internal Medicine and Medical Oncology.

Dr Amit Rauthan is presently a Consultant in the Department of Medical Oncology, Hemato-oncology and Blood and Marrow transplant at one of India's leading super speciality hospitals located in Bangalore. This facility is particularly renowned for its comprehensive Cancer Care Centre and Bone Marrow Transplant Programme, for which it has an affiliation with the University of Minnesota Physicians, USA.

Dr Rauthan has very good experience in managing patients with solid organ cancers like breast, gastrointestinal tract, lung and ovarian cancers and also hematological cancers like leukemia, lymphoma and myelomas. He treats his patients using the latest chemotherapy and biological therapies using central access devices like Chemo-ports, Hickman catheters & peripherally inserted central catheters. Most patients are also on portable infusion pumps, enabling most treatment to be on day care basis with minimal stay inside the hospital.

Dr Rauthan has special interest in blood and marrow transplants (BMT). He has conducted many successful Allogeneic and Autologous transplants.
