

Location: Mumbai

Nova Medical Centre in Mumbai is spread across 10,000 sqft and has ultra-modern facilities. The center has 4 ultra-modern operating rooms, 16 beds with 3 deluxe rooms, 7 OPD consult rooms with separate ENT and Ophthalmology units, completely equipped laboratory, a retail pharmacy and fully equipped preventive health check up unit. Each patient bed/room is equipped with gas lines, monitoring equipment and defibrillators. These are constantly monitored by duty doctors and trained staff.

More than 70 per cent of all surgeries can be performed under daycare procedures. Nova Specialty Surgery offers upwards of 700 such procedures, covering specialties like ENT, General Surgery, Gynaecology, Ophthalmology, Orthopaedics, Paediatrics, Plastic & Cosmetic, and Urology.

Minimally invasive procedures are hugely beneficial to patients because of smaller incisions, minimal damage to surrounding tissues, lesser inflammation and negligible blood loss. Since the procedures do not require an overnight stay, patients can also avoid contracting Hospital-Acquired Infections (HAIs).

Typically, surgical procedures at our Center take 30 minutes to 2 hours, allowing patients to return home the same day. Patients undergoing daycare procedures recover faster and resume normal routine within a day or two.

Facilities:

Operating Theatres: The Center has 4-5 operating rooms with state-of-the-art equipment and modern facilities. Nova's doctors and facilities adopt the latest techniques and advances in surgery.

Doctor's Offices: Patients are served across multiple rooms dedicated to various specialties. Doctors are available for consultation and surgical procedures.

Specialties: ENT, General Surgery, Gynaecology, Ophthalmology, Orthopaedics, Paediatrics, Plastic & Cosmetic, Radiology and Urology.

Pre-Op and Post-Op Care: Pre-op and post-op beds/rooms are equipped with gas lines, monitoring equipment and defibrillators. The rooms have ultra-modern facilities.

Diagnostic Equipment: Each Nova Specialty Surgery Center is equipped with X-Ray, Ultrasound, Echo, TMT and C-Arm (Routine, Special, DSA) machines. Nova avoids larger diagnostics equipment like MRI and CT to maintain low capital expenditure and overheads. For the more complex MRI and CT scans, Nova Specialty Surgery has partnered with leading diagnostic centers to ensure consistency in services.

Pathological Laboratory: Our Pathology Labs can perform Biochemistry, Hematology, Micro-Biology, Cytology & Histopathology, Serology, tumor markers, infective agents, Flow Cytometry, Real Time PCR and other tests.
