

Location :Bangalore

Narayana Nethralaya is a super specialty eye hospital in Bangalore.

Started in 1982, the hospital has expanded tremendously. The new eye hospital at Narayana Health City is spread over 120,000 sq.ft, and has separate wings for various specialties and departments, which are fully equipped with state of art diagnostic and therapeutic tools. Paediatric eye health is one of the focus areas.

Ocular health is closely related to many systemic diseases like diabetes, hypertension, heart disease, systemic infections and cancer. The hospital's focus on basic and applied research, state of the art diagnostics and therapeutics, in conjunction with some of the best minds in the Narayana Health City delivers path breaking changes in treatment paradigms. The focus is on applied research in areas such as Stem cells, Molecular techniques (Polymerase chain reaction), Genetics, Ocular Immunology and infectious diseases.

The hospital caters not only to routine eye problems but treats patients with complicated eye diseases too. Since most of the eye surgeries are done by modern techniques, hospitalization is not usually needed. But if hospitalization necessary, appropriate facilities are available.
