

Location: Thane- Mumbai

Wavikar Eye Institute is a world-class, exclusive facility located 25 kms from Mumbai International Airport.

The hospital has a built up area of 35000 Sqft. Area including 6 state-of-the-art operation theatres, fully functional wet lab facility, a library and a multimedia room, a 56-seater auditorium to hold meetings for doctors as well as patients.

This hospital is one of the very few centres conducting surgeries under topical anaesthesia with no need to give anaesthetic injection in to the eye. Further adding to the benefit of stitchless surgery with 2.8 mm, the specialists here have devised own technique of surgery through 1.7 mm incision yielding superior results known as 'Micro- coaxial Phaco'.

With the arrival of the revolutionary LenSx-Laser Refractive Cataract Surgery, cataract surgery is poised to undergo a radical transformation. Wavikar Eye Institute was the first in Asia to introduce this technology.
